

NATIONAL MANUFACTURING DAY 2022

Company Name: A&M EDM

Company Address: 25 Mornington Road, Smethwick, West Midlands B66 2JE

OUR NATIONAL MANUFACTURING DAY

Overview: A&M EDM provide perfectly engineered solutions, manufacturing bespoke high value, low volume components and tooling. A&M apply extensive spark and wire EDM and CNC machining capabilities to design, manufacture, assemble and test components for many sectors including aerospace, automotive, marine and motorsports.

How we will be involved with National Manufacturing Day:

We are opening our doors to two local schools – Shireland Collegiate Academy (morning) and Sandwell Academy (afternoon) for students to experience a modern manufacturing workplace. The Groups will be briefed on safety procedures regarding specified walkways and escorted to the factory floor by Line Managers (who are former apprentices). Our aim is to showcase our manufacturing from CAD design to CNC milling and other processes through to inspection. Concluding with a Q&A with apprentices.

Date & Time: Thursday 07 July 2022
