

NATIONAL MANUFACTURING DAY 2022

Company Name: Royal National Lifeboat Institute

Company Address: RNLI Support Centre, West Quay Road, Poole, BH15 1HZ

OUR NATIONAL MANUFACTURING DAY

Overview: RNLI crews and lifeguards provide a 24-hour rescue service in the UK and Ireland, and have saved over 142,700 lives since 1824; but we're more than a rescue service.

Our in-house Engineering teams design our state-of-the-art Lifeboats and support them through their lifecycle. The RNLI's Cowes based Inshore Lifeboat Centre build and maintain our smaller Inshore lifeboats, and in 2015 our All-weather Lifeboat Centre was opened to bring in-house the manufacture of the latest Shannon class lifeboat, and to refit and maintain our other classes of all-weather lifeboat in a modern, lean, manufacturing facility.

How we will be involved with National Manufacturing Day:

Come and visit the RNLI's All-Weather Lifeboat Centre in Poole Dorset to see how we manufacture the latest generation of Lifeboats from start to finish. We will be offering tours of our lifeboat production facility and the chance to look onboard a lifeboat.

Tours will last 1.5hrs with a capacity of 10 per tour.

Date & Time: 07 July 2022 | Tour start times: 9:00 – 10:40 – 13:00 – 14:40
