

PRIVATE TOUR – BY INVITATION ONLY

Company Name: McLaren Composites Technology Centre
Company Address: McLaren Automotive Ltd, Seldon Way,
Advanced Manufacturing Park, Catcliffe, Rotherham, S60 5XA

OUR NATIONAL MANUFACTURING DAY

Overview: The McLaren Composites Technology Centre (MCTC) in the Sheffield region is more than simply a manufacturing location. It is an innovation centre where new technologies and processes are developed to further our understanding of composite materials, including carbon fibre.

Every McLaren supercar and hypercar car is built with world-leading carbon fibre technology at their core. Components developed and manufactured at the MCTC are stronger and lighter than steel or aluminium. As we advance towards the era of electrification, the ability to drive weight out of vehicles and, therefore, increase efficiency, has increasing relevance to our world today for the automotive sector and beyond.

What will you do on National Manufacturing Day?

McLaren is supporting National Manufacturing Day by welcoming the Mayor of South Yorkshire. McLaren offers opportunities to people in the region through high skilled, high valued career opportunities.

Date & Time: Private Tour
